Electronic Design and Development Engineer

Martech is looking for talented, creative individuals who can demonstrate a strong aptitude for board-level electronic design with embedded firmware development.

Ideally you will be a seasoned electronics engineer with experience in industry, able to develop circuits and systems from design specifications.

We are also interested to hear from recent graduates in relevant disciplines who we can train.

Qualifications are important, but demonstrable skill, know-how, ability to innovate and solid track-record are more highly prized.

Working on a diverse range of projects for high profile customers in, Industrial, Aerospace, Automotive, Sub-Sea and Defence engineering sectors, our engineers have the opportunity to engage in the design process from initial concept right through to product delivery. An ability to understand the customer's requirement together with an ability to innovate and produce creative solutions is paramount. In a addition to board level designs you will also be involved in the broader design and product development, engineering technology that is not only functional but solves less obvious customer needs and expectations.

Key Requirements

Candidates should ideally have experience in some of the following areas:

- Electronic systems design (digital and analogue)
- Embedded firmware (Microcontroller, Raspberry Pi, etc)
- User interface software (Windows, RPi)
- Product design
- System testing
- Fault diagnosis

As well as a demonstrable practical aptitude, enthusiasm, adaptability and a positive attitude and are of equal importance. For this role we offer a competitive salary dependent on skills and experience and would be pleased to hear from all candidates that meet the above criteria.

Other Requirements

- Must have valid UK 'Right to Work'
- Must be suitable for UK security clearance

About Us

Martech is part of the Coda Octopus group of companies, a US NASDAQ listed company, and is based near Weymouth Dorset.

Martech works with a number of leading companies across a diverse range of industries including Defence, Aerospace, Subsea, Automotive and other similarly demanding sectors, designing and manufacturing electronic and electro-mechanical technology to meet exacting requirements. Our customers include many leading UK and international brands.
